

## trouble with AGWA 2.0 documentation

Posted by jlehrter - 2010/03/18 08:02

---

Hi,  
The AGWA 2.0 documentation does not open when I click 'Help'. Instead, I get the error message 'Error Locating file' 'Could not locate AGWA2.chm'. I have the .chm file in the documentation folder. If I try to open the help file outside of AGWA, I can see the Table of Contents, but if I click on a topic I get a message saying the 'The address is not valid'. I installed the 'AGWA2 Setup 9.2-20081231.zip' and the 'AGWA 2.0 Package.zip'.

Thanks,  
John

Hi John,  
I believe only the AGWA2 setup file for ArcGIS 9.3 locates the documentation successfully. There was a bug locating the file in earlier versions of the installer. I will be releasing an updated AGWA2 setup program for, at the very least, ArcGIS 9.2 this spring that has the bug fixed.

Regarding the .chm file now working when you click on a topic, the version you have is corrupted. Replace it with this file and you should be able to access the documentation, though it won't resolve the issue with the Help buttons inside AGWA2. You'll just have to navigate to the appropriate section manually.

Fixed documentation (.chm) file

Shea
